

Main products:

Wide belt sander	Brush sander	Planer sander
Lacquer sander	Segment pad sander	Metal sander

Brand:

Motimac®

WT TRHG1300

3-year warranty*
ensuring no hassle
and unforeseen costs

Quick return on
investment

Low Total Cost of
Ownership

Ensuring low price
by sourcing cleverly
in large quantities

	WT TRHG1300		
	T (CROSS)	R (ROLLER)	H (segment pad) (BELT WITH CHEVRON)
Working width (mm)	1300		
Min working length (mm)	500		
Working thickness(mm)	3～150		
Conveyor speed(m/min)	5～30		
Motor for the 1 st (kW)	15(4P)		
Motor for the 2 nd (kW)		15(4P)	
Motor for the 3 rd (kW)			15(4P)
Motor for conveyor (kW)	4		
Motor for lifting(kW)	0.55		
Diameter of the roller(mm)	/	300mm/40shore	/
Sandpaper size (mm)	150×5350	1350×2620	1350×2620
Chevron Size (mm)	140×4740	/	1350×2190
Working pressure (Mpa)	0.6		
Motor for the vacuum (kW)	7.5		
Dimension of the machine(mm)	W 2235 × L 3610 × H 2450～2600		
Weight (kg)	6300		
Work table height (mm)	900		
Air jet cleaning for sandpaper	YES		
Brush cleaning for conveyor belt	YES		

Scotch brittle	YES
CE standard	YES
Vacuum table	YES
Package	Iron pallet
Shipment	40HQ
Production lead time	30days
Voltage	380v/50hz/3phases

The above is subject to update without further notice.

 Cross unit--T	 Roller unit ---R
 Super Finish with chevron belt---H	 Scotch brittle---G

Segmented pad---80 pads,each pad width 16mm.
Smaller pad , more accuracy

Computer control system, imported from Italy (supplied to most peers in Europe and has a history of more than 50 years). It is also equipped with an industrial-grade computer for high-speed data calculation, detecting the position of the plate to determine the key drop time, formula management, and can store unlimited sanding modes. , you can switch and call any recipe at will.

The whole system comes standard with Siemens/ABB electrical appliances. Reduce equipment operation and maintenance costs.

Digital multi -point intelligent scanning technology , with more than 400 scanning points, can accurately collect the cross-sectional contour of the work piece, and play a role in precise positioning of the keys.

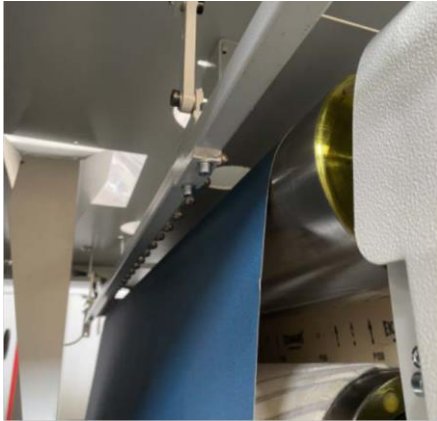

Cleaning brush roller to clean the conveyor belt.

1. clean brush is drive with power,take the initiative to drive
2. Effectively reduce dust pollution on the surface of the board and improve sand in g accuracy

Cleaning : rotative air blower at the end to clean the panel makes the surface of the work piece clean and flawless after sanding, and the next process can be directly carried out with out any cleaning process

Air jet cleaning to clean the sandpaper The air volume is distributed in a fan shape and evenly distributed

Avoid dust traces caused by pinhole air flow

Dust hood inside to reduce dust dispersion

Sandpaper length 1350*2620mm To prolong the life the sandpaper and improve the heat dissipation of sandpaper

Adjust the graphite pad up and down Easy to operate and visualize

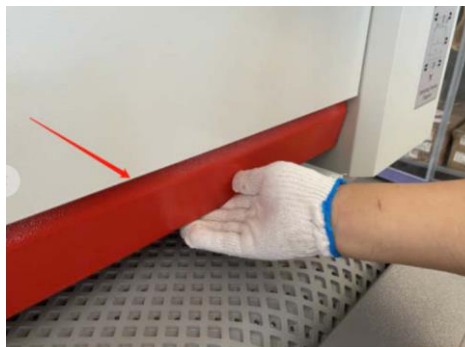

Pneumatic system-- Airtag brand Stable, reliable, low maintenance cost

German brand FAG bearing 5 years free maintenance

Pressure roller that can be pressed tightly when the plate passes through, rectangular spring, easy to adjust

Safety automatic board to protect workers If man hand entry, the machine will automatically shut down

Tension cylinder + limit switch It is with belt break age protection function

Adjustable tension pressure control Different pressures can be adjusted according to sand belts of different materials.

Brake: can stop with in 4 seconds

Helical gear reducer, has the highest transmission efficiency and improves transmission torque

The light inspection lamp after the board comes out helps quality inspectors detect the layout effect. More user-friendly design

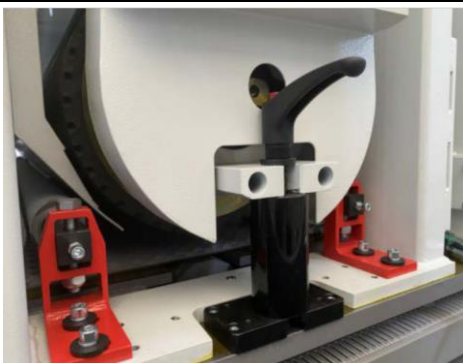

The lifting system adopts the MBS full closed-loop positioning system, and the positioning accuracy is extremely high. It is 25 times that of ordinary threaded screw, high-precision digital display detection height, display accuracy of 0.01mm.

Double chains from Military manufacturer Safe and stable

German Optibelt brand : Poly V-belt Compared with traditional V-belts, the transmission is more precise and the effect is higher. The price is more than 10 times that of ordinary triangle belts

The locking handle uses German brand The quality is stable and not easy to slip.

Iron pallet to protect the machine during sea freight
